I'm a junior student majoring in Computer Science at Texas A&M University and am participating in the Global Tech Experience to gain more knowledge and skills about web development. As a junior in computer science with a major in cybersecurity and an enthusiast involved in web development and coding, my goals fell along a multifaceted path. First, my goal is to strengthen my basic knowledge of computer science by excelling in core courses and having a deep understanding of algorithms, data structures, and programming languages. At the same time, I am committed to honing my cybersecurity skills, with a focus on ethical hacking and cybersecurity, so that I can contribute to a safer digital world. In the field of coding and web development, I look forward to taking on increasingly complex projects, collaborating with my colleagues, and continuously expanding my skills to create innovative web applications. and user-friendly. Ultimately, my goal is to bridge the gap between IT and cybersecurity and use my web development expertise to create accessible and secure digital solutions.

Authorized to work in the US for any employer
